Probability Seminar

4:15pm, Monday, April 2, 2012
Sequoia Hall Room 200
Cookies served at 3:45pm, 1st Floor Lounge.

Speaker: Ben Green
Department of Pure Mathematics and Mathematical Statistics,
University of Cambridge

Title: Approximate groups and applications

Abstract:
What does it mean for \( A \) to be an approximate group? What can one say about approximate groups? What applications does this have? I will try to answer some aspects of the first two of these questions in this talk.
