DEPARTMENTAL SEMINAR

The Berkeley/Stanford Joint Statistics Colloquium  
4pm, Tuesday, April 24, 2012  
Evans Hall Room 60  
University of California, Berkeley

Speaker: Wing H. Wong  
Departments of Statistics and of Health Research and Policy,  
Stanford University

Title: Phased genome sequencing and applications

Abstract:  
We will review recent progress in genome sequencing that can provide phase information. The ability to resolve long range phasing will simplify statistical analysis and will enable new approaches to the study of many issues in biology and medicine. Some of these applications will also be discussed.
